National Register of Historic Places
Registration Form

This form is for use in nominating or requesting determinations of eligibility for individual properties or districts. See instructions in Guidelines for Completing National Register Forms (National Register Bulletin 16). Complete each item by marking “x” in the appropriate box or by entering the requested information. If an item does not apply to the property being documented, enter “N/A” for “not applicable.” For functions, styles, materials, and areas of significance, enter only the categories and subcategories listed in the instructions. For additional space use continuation sheets (Form 10-900a). Type all entries.

1. Name of Property

DESCRIPTION

The Miramar Public School, 109 N.E. 19th Street, is a masonry, two-story Neo-Classical style building clad in stucco. Designed by the architectural firm of Mayer and Dobson, it was constructed in 1926. The building has a T-shaped exterior plan and a flat roof with parapets. Its structural system is comprised of concrete block construction resting atop a concrete foundation.

The principal (south) elevation is symmetrical and features a central projecting bay with a full-height porch that contains the building's main entrance. The roof of the porch is supported by four fluted Ionic columns and the parapet contains a masonry entablature embellished with the building's name: "Miramar Public School". The entrance doors are accentuated by a scrolled pediment which contains a decorative masonry cartouche bearing the building's initials and construction date: "M.S. 1926". The metal frame replacement windows found throughout the principal elevation are triple set within each bay's broad rectangular openings. Fenestration is regular.

The side and back elevations of the building lack columns but otherwise have the same fenestration and decorative ornamentation found on the principal elevation.

The school has a central hall interior plan. Administrative offices are located near the front entrance. A groin vaulted ceiling is located at the junction of the north-south and east-west corridors. Stairs at the end of each corridor provide access to the second story.

The Miramar Public School has undergone few modifications and maintains its integrity of design, materials, workmanship, setting, location, feeling, and association.
STATEMENT OF SIGNIFICANCE:

The Miramar Public School is significant at the local level under Criterion C as a fine example of the Neo-Classical Revival style in an institutional building. The building is architecturally noteworthy for its stylistic features, portico details, size, and relationship to the surrounding neighborhood.

The visual composition of the Miramar School represents a good adaptation of the Neo-Classical Revival style to the South Florida climate. The building’s excellent design, craftsmanship, and detailing are evident in its strong symmetrical composition, articulated projecting entrance, and the masonry ornamentation found throughout the various elevations. It was completed in 1926 at a cost of $145,000.4

The design of the Miramar School is indicative of the popular 1920s trend to design Miami’s institutional buildings in nationally recognized architectural styles. Throughout the Florida Boom years, the neo-Classical style was popular because of its sense of permanence and establishment. Other examples of the style in Miami include the Dade County Courthouse (NR 1989) and the Old U.S. Post Office and Courthouse (NR 1989).

The construction of the Miramar School in 1926 reflects the growing demand for city services that resulted from Miami’s residential expansion northward during the 1920s Florida Land Boom. Land for a new school was purchased as early as 1923 to accommodate the new residents in the popular Miramar subdivision, but the school was not completed until 1926.

The Miramar School closed its doors during the mid-1970s. Several years later it reopened as an educational and orientational assistance facility for Cuban refugees arriving in the United States via Mariel, Cuba. During the early 1980s, the school housed the Haitian Refugee Center. At present, the building is once again in operation as an elementary school serving grades three through five.

The Miramar Public School has the distinction of being one of Miami’s oldest surviving schools whose architectural fabric has remained virtually intact. Although the architects for the building have been identified, research has provided no biographical information on them. The building is significant as a reflection of the development of Miami’s architectural styles during the 1920s Florida Boom.

Reviewer's Comments

The cover nomination and the individual forms for the properties within the Miami Multiple Resource Area clearly illustrate the importance of the historic resources still remaining in the core of Miami's downtown. The residential buildings and the commercial buildings are all well documented, and the forms explain clearly the significance of these properties in the city's commercial and residential growth periods. Many institutional buildings, primarily religious institutions, also have been nominated. The properties in this category constructed during the boom times of the 1920s reflect the growth of the city during that time. This context is documented briefly in the cover form. The National Register has therefore accepted several of these properties under the area of significance "Religion" or "Community Development."

The significance of several of these institutional properties, however, is not demonstrated in the documentation. Five of the nominations included within the Miami Multiple Resource Area nomination, four churches and one school, are therefore being returned for further analysis. In two cases, the Greater Bethel AME Church and the St. John's Baptist Church, the significance of the buildings in community developmental history is not established. What specific role did these churches play in the social, religious, and institutional history of Miami? In two other cases, the Ebenezer Methodist Church and the First Presbyterian Church, the significance of the architectural design and the role of this particular building in religious history and the community's developmental history is not documented either, especially since these properties are significantly less than fifty years of age. The importance of Ebenezer Methodist in the riots of the 1980s must be stated in historical terms, using historical research methods, and may have to wait to be recognized with the perspective of scholarly review. Finally, the history of education in the city and the role of the Miramar Public School in this historical pattern needs to be documented in that specific nomination—this is particularly key because education as an area of significance was not covered in the cover nomination.

DESCRIPTION:

Condition: Good

The Miramar Public School is a two-story masonry structure laid out in a modified cruciform plan. Construction of the building began in 1926 according to plans provided by the architectural firm of Mayer and Dobson. The building's structural system is comprised of concrete block construction resting atop a concrete foundation. The appearance of the building is characteristic of the Neo-Classical style of architecture.

The exterior of the building is clad in stucco and capped by a flat roof behind a masonry parapet wall. The principal elevation of the building is 11 bays long, with the center three bays set within a projecting entrance and the other eight bays evenly split between the side wings. The projecting section of the elevation contains four tall fluted Ionic columns which serve to shelter a small porch leading to the building's entrance. The entrance is characterized by wooden and glass doors which appear to be original. All the fenestration of the principal elevation, as most of that found on the other elevations, appears to be original to the building with awning-type windows set within metal frames. The four Ionic columns support a masonry entablature that is embellished with the building's name on its architrave: "Miramar Public School." The entrance is surmounted by a scrolled pediment which contains a decorative masonry cartouche bearing the building's initials and construction date: "M.S. 1926." The windows found in the principal elevation are triple set within each bay's broad rectangular openings. The side elevations of the building carry the same decorative ornamentation found on the principal elevation, except that there are no columns found anywhere else. A smooth stucco surface, inset with the original windows, serves to characterize the other building elevations.
One of the most striking features of the Miramar School is its interior floor plan which survives intact. The classrooms are laid out along the cruciform corridors, with an auditorium found in the northwest quadrant of the area delineated by the cruciform. The auditorium spans one and one-half stories, and below it is located the school cafeteria. The offices for the school are located within the projecting center section of the principal elevation. At the junction of the corridors is a groin vaulted ceiling, and at the ends of the corridors are stairs that provide access to the second floor.

This building has undergone relatively few modifications, and its architectural integrity remains unaltered.
STATEMENT OF SIGNIFICANCE:
Specific Date: 1926
Architects: Mayer and Dobson
Builders: Ward and Ward

The Miramar Public School is architecturally significant as a fine example of Neo-Classical Revival style in Miami. The building is architecturally noteworthy for its stylistic features, portico details, size, and relationship to the surrounding neighborhood. The Miramar School also possesses historical associations with the growth of the Miramar subdivision in the 1920s and with the recent influx of Cuban and Haitian refugees during the early 1980s.

The visual composition of the Miramar School represents a good adaptation of the Neo-Classical Revival style to the South Florida climate. The excellence of the building's design, craftsmanship, and detailing is evident in its strong symmetrical composition, articulated projecting entrance, and the masonry ornamentation found throughout the building elevations. It was completed in 1926 at a cost of $145,000.

The design of the Miramar School is indicative of the popular 1920s trend to use a nationally recognized architectural style upon the institutional buildings being constructed in the young city. Throughout the Boom years, the Neo-Classical style was a popular choice for institutional buildings for it provided the structure with a sense of permanence and establishment. The Miramar School has the distinction of being one of Miami's oldest surviving schools whose architectural fabric has remained virtually intact. Although the architects for the building have been identified, research has provided no biographical information on them.

The construction of the Miramar School in 1926 reflects the growing demand for city services that resulted from Miami's residential expansion northward during the Boom. Land for a new school was purchased as early as 1923 to accommodate the new residents in the popular Miramar subdivision, but the school was not completed until 1926.
The Miramar School had closed its doors during the mid-1970s but reopened during the "Mariel Boatlift." It was here that the Cuban refugees arriving in the United States via Mariel, Cuba were provided educational and orientational assistance. With the cessation of Cuban refugees arriving, the school turned its focus to house the Haitian Refugee Center during the early 1980s. At present, the Haitian Refugee Center has been relocated, and the School is operating as an elementary school serving Grades 3 through 5.
